Follow-ups

- **DT-14** needs a QR eSIM test account that can log in on staging (update DTONE_QR_EMAIL / password).
- **Bill payment (DT-07, DT-09), Help articles (HP-07 to HP-14) and CC-14** are parked with test.fixme - change back to test(...) to re-enable once staging is ready.
- **Staging data created by this run:** new signup / verification accounts, recipients, a \$12 one-time scheduled transfer, two escalations (closed by the tests) and a password-reset email.
