

Regression Run Report

Remitbee CP Playwright flow suite · @regression · staging cp.wisecapitals.com

Result: 317 of 325 executed tests passed (97.5%). 8 failed, 10 skipped. Local run on the Mac with 10 browsers and no split, so Send Money and Auth ran in parallel with everything else. Help and Currency converter are switched off (17 modules, 335 tests). 5 of the 8 failures are the known Send Money load problem; **PA-16, CE-13 and VF-09** need attention.

Run details

05 Oct 2026, 16:42 – 17:18 IST · 10 browsers in parallel (headless) · duration 35m 46s · staging cp.wisecapitals.com

335

total tests

317

passed

8

failed

10

skipped

97.5%

pass rate (executed)

10 browsers in parallel (headless), no split for shared accounts. VF-16, VF-07 and VF-17 were skipped only because VF-09 failed: the verification tests run as one chain on a new account.

Results by module

#	Module	Tests	Passed	Failed	Skipped	Time*	Status
00	Signup	30	27	0	3	3m 40s	Pass*
01	Auth	31	29	1	1	6m 26s	Fail
02	Dashboard	13	13	0	-	5m 55s	Pass
03	Send Money	20	15	5	-	18m 22s	Fail
04	Exchange	20	19	1	-	14m 41s	Fail
05	Wallet	14	14	0	-	8m 55s	Pass
06	Recipients	24	24	0	-	22m 38s	Pass
07	Settings	15	15	0	-	13m 53s	Pass
08	Transactions	18	18	0	-	10m 27s	Pass
09	Rates	18	18	0	-	10m 52s	Pass
10	Rewards	15	15	0	-	10m 35s	Pass
11	Schedule transfer	30	30	0	-	29m 49s	Pass
12	Verification	17	13	1	3	8m 2s	Fail
13	Account	20	20	0	-	9m 31s	Pass
14	Escalation	20	20	0	-	11m 24s	Pass
15	DT One	20	17	0	3	10m 44s	Pass*
16	Referral	10	10	0	-	5m 35s	Pass
Total		335	317	8	10		

Time* = total test time in that module (browsers run modules side by side, so these add up to more than the run time).

Pass* = all executed tests passed; module has skipped tests.

Failed tests (8)

Module	Test	What happened
Auth	PA-16 invalid OTP shows error	Wrong OTP (000000) was accepted: no error, user reached the dashboard. Failed twice today — needs a manual check on staging.
Send Money	SM-06 existing recipient visible in recipient list	Send money page did not finish loading in 40 s.
Send Money	SM-08 exchange rate displayed on send money page	Send money page did not finish loading in 40 s.
Send Money	SM-16 minimum amount validation shown	Send money page did not finish loading in 40 s.
Send Money	SM-17 fee displayed on send money page	Send money page did not finish loading in 40 s.
Send Money	SM-20 payment method edit option visible	Test ran out of time (90 s).
Exchange	CE-13 business account exceeding daily limit shows restriction	New: the daily exchange limit message did not appear within 15 s.
Verification	VF-09 special characters in first name show validation error	New: no error appeared under the first-name field after entering special characters.

Skipped tests (10)

Module	Test	Type	Reason
Auth	PA-23 SMS option on forgot password navigates correctly	Skipped by precondition	No SMS option on forgot-password page
Verification	VF-16 level 1 can be completed (address + occupation)	Skipped by precondition	Not run: VF-09 failed earlier in the same chain
Verification	VF-07 level 2 document upload accepts supported file formats	Skipped by precondition	Not run: VF-09 failed earlier in the same chain
Verification	VF-17 level 2 document can be submitted	Skipped by precondition	Not run: VF-09 failed earlier in the same chain
Signup	SU-28 OTP verification heading has id enter-your-verification-code	Skipped by precondition	OTP step needs a live signup
Signup	SU-29 verify-code button has id verify-code	Skipped by precondition	OTP step needs a live signup
Signup	SU-30 submitting empty OTP shows error-message	Skipped by precondition	OTP step needs a live signup
DT One	DT-07 bill payment for India (VOIP) reaches provider step	Parked on request	Bill payment parked
DT One	DT-09 bill payment country dropdown shows supported countries	Parked on request	Bill payment parked
DT One	DT-14 QR eSIM account can open the eSIM flow	Skipped by precondition	QR test account cannot log in on staging

Next steps

- **PA-16:** check by hand on staging — log in with the personal test account and enter 000000. If it logs in, raise a bug (a security issue if production behaves the same).
- **CE-13 and VF-09 (new):** re-run with one browser — `npx playwright test --config=playwright.flow.config.ts --project=flow-chromium --workers=1 tests/flows/04-exchange.flow.spec.ts tests/flows/12-verification.flow.spec.ts --grep "(CE-13|VF-[0-9]{2}) "`. If they still fail, they will be fixed from the live page.
- **SM-06/08/16/17/20:** known parallel-load issue on the shared account; they pass with one browser.
- **Use the split for future runs** so Send Money and Auth run with one browser: `SUITE=regression WORKERS=10 bash ci/jenkins-run.sh`.
